**THE UNPARALLELED  
HARDNESS OF GRANITE**

 **granite**

- ◆ Unparalleled hardness
- ◆ Scratch, acid, heat, and stain-resistant
- ◆ Timeless character
- ◆ Maintenance-friendly
- ◆ Various finishes possible
- ◆ Rich colour palette
- ◆ Own quarries in Tarn, Nari Black, Labrador, Rose de la Clarte and Blanc Perle

## GRANITE EXPERTS

# Granite reconciles the unique beauty of nature with its indomitable power.

With more than a century of experience under our belts, we are true granite experts. Our specialists select the granite from both our own quarries (in France, Norway, Portugal, and South Africa) and other quarries worldwide. In addition, our geological team subjects all materials to strict quality control. We link this quality guarantee to a very thorough knowledge of all the technical properties, uses, and finishing possibilities of this material.

Granite is a natural stone, meaning geological processes have determined its character for centuries. The result is a product that is never 100% the same.

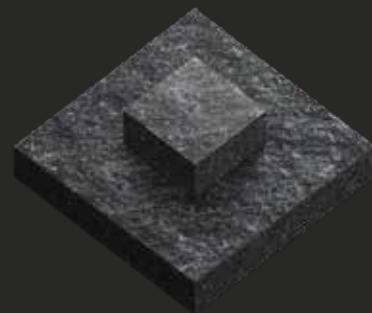

The colour palette, the patterns, ... each slab is different, surprising, and authentic.

Even after mining, granite lives on. It gets more beautiful over time. With its exceptional hardness and limited porosity, granite has plenty of time for this. These technical properties form the basis for decades of resistance to water, frost, and wear.

That durability is more than just a very long lifespan. Granite is also an environmentally friendly product that is only shaped by the power of nature. So it doesn't need any energy for its production. CO2 emissions during installation and production are also low. And because it is 100% recyclable, granite can be reused for a wide range of applications.

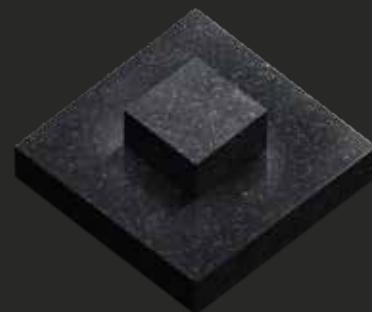

# A selection of our finishes

The finishes shown here are a selection of the 12 surface finishes Brachot Surfaces offers as standard. We are also constantly developing new finishes and optimising existing ones at Brachot Surfaces, which means we always find the finish that best suits the material, your tastes, and the style of your home.

## Anzano

This semi-coarse finish is slightly coarser than a matt or polished finish, but still feels very satisfying and soft. The non-slip result still has a beautiful satin shine to it.

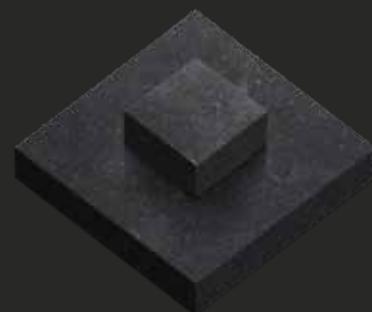

## Polished

Without a doubt, the glossiest and smoothest finish, highlighting the colours, patterns, and white spots. Dark shades create a mirror effect.

## Honed

The surface is sanded until a warm, matt shine is obtained. The grain size during sanding determines the final result.

## Letano

This original, matt, and slightly brushed finish enhances the natural colour of granite. The result is a 'leather feel'.

# Choose the granite that suits you

Granite creates a special visual effect through the unique interplay of lines, shading, and structures. Sometimes speckled, sometimes uniform, but always so different, so unique. This unpredictability is characteristic of a product that was modelled by nature.

It is also a versatile material for various uses that add an aesthetic value to your interior and exterior.

That this ancient material is also offered in various sizes, standard thicknesses of 2, 3, or 4 cm (and up to 20 cm upon request) and over 12 possible surface finishes ensure a completely personal touch.

## Extremely strong and maintenance-friendly

Granite is the hardest of all types of natural stone. As a result, this natural material is highly scratch, heat, acid, and stain-resistant. So it can withstand decades of intensive use, in the kitchen as a floor or kitchen worktop, for example. In addition, granite can also be perfectly used indoors and outdoors as wall, façade, and patio cladding.

Granite is also very maintenance-friendly. With the right cleaning and protection products, adapted to the use, soiling, and surface coarseness, granite will remain intact for many decades. In fact, it gets more beautiful over time.

# CRAFTING VALUE FOR FUTURE GENERATIONS

Brachot Surfaces is a European producer of high-quality natural stone and composite materials with the brands Unistone (quartz composite), Unimarble (marble composite), Uniceramica (ceramics), and Terrazzo (cementitious slab material). Brachot Surfaces is thus a comprehensive supplier of high-quality slab material for interior and exterior finishing. Brachot Surfaces' success lies in the production of slabs in natural stone and composite materials, technical innovation in materials and finishing, as well as years of expertise. Knowledge and experience in the selection of superior blocks are an indispensable asset in the production of natural stone slabs. This makes Brachot Surfaces the ideal partner for the selection and purchase of blocks of natural stone.
