- ◆ Timeless elegance and class
- ◆ Scratch, acid and heat resistance
- ◆ High level of hardness
- ◆ Very easy to maintain
- ◆ Ideal as a long-lasting kitchen worktop
- ◆ Various materials available
- ◆ Various finishes possible

## LONG-LASTING LOOKS

# Quartzite effortlessly combines elegance and ease of care in an indestructible, long-lasting material.

Who says you can't have it all? The unique characteristics of quartzite bring together the best that nature has to offer. This durable natural stone is one of the hardest materials to be found. In fact, quartzite is a metamorphic rock formed from sandstone. Heat and high pressure have melted the quartz minerals together into a hard, very compact rock.

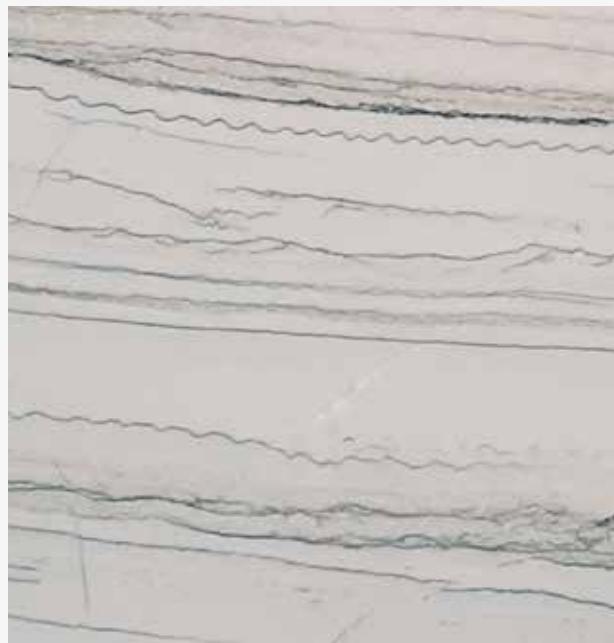

This process, which takes centuries, creates the characteristic, elegant appearance of quartzite. The colour palette and veins are different in every slab. This authentic display guarantees a unique result time after time.

What is more, quartzite has a high density and low porosity. The formation of the material gives it its acid, heat and scratch-resistant properties. This makes it ideal for intensive use, in places such as the kitchen.

This natural stone is also an environmentally friendly material with a very long lifespan. The stone is formed by nature. So no precious energy is lost in producing it. Brachot Surfaces makes an ongoing commitment to keeping its CO<sub>2</sub> emissions as low as possible when sawing and installing the stone as well. In this way, quartzite adds an ecological aspect as well as a touch of style to every interior, along with its unrivalled durability.

## Exceptionally beautiful and easy to maintain

Calacatta Quartzite/White Macaubas

The hardness of quartzite and its elegant appearance are the greatest attributes of this natural stone. The material is scratch, heat and acid-resistant, meaning that it can cope with intensive use over a long period. So it is ideal for a durable kitchen worktop or kitchen floor.

Quartzite is especially easy to care for. Don't use too much water and stick to the correct cleaning and protection products suitable for the purpose, the amount of dirt and the surface. That way, you will be able to enjoy the comfort of durable quartzite for many years to come.

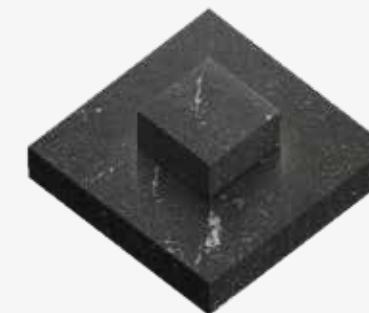

## A selection of our finishes

With these four finishes, quartzite looks great in any project and is suitable for every application. Brachot Surfaces is continuously optimising its finishes and developing new ones. That is how we always find the finish that best suits the material, your taste and the style of your home.

### Anzano

This semi-rough finish is somewhat rougher than a matt or polished finish, but feels particularly soft and pleasant. The non-slip result also has an attractive satin sheen.

### Polished

The shiniest and smoothest finish by far, bringing out the best in the colours, veins and minerals.

### Honed

A warm, matt shine created with a scoured surface. The grain used for scouring determines the final result.

### Letano

An original, matt, lightly brushed finish that brings out the natural colour of quartzite. The result is a 'leather touch'.

# Opt for robust, aesthetic class

The hardness of quartzite makes it an excellent choice for all kinds of applications. The marbled appearance and easy care of granite make it a particularly popular, long-lasting material for kitchens. The colours and veins give every worktop a touch of style.

Quartzite is a versatile, age-old material made of quartz minerals. That makes it harder than glass, offering possibilities for countless interior applications.

The soft, neutral or striking colours offer suitable possibilities for every home, from country to modern style. The range of formats and thicknesses, 12 materials and 4 possible surface finishes create a personal touch.

Brachot Surfaces is a European producer of high-quality natural stone and composite materials with the brands Unistone (quartz composite), Unimarble (marble composite), Uniceramica (ceramics), and Terrazzo (cementitious slab material). Brachot Surfaces is thus a comprehensive supplier of high-quality slab material for interior and exterior finishing. Brachot Surfaces' success lies in the production of slabs in natural stone and composite materials, technical innovation in materials and finishing, as well as years of expertise. Knowledge and experience in the selection of superior blocks are an indispensable asset in the production of natural stone slabs. This makes Brachot Surfaces the ideal partner for the selection and purchase of blocks of natural stone.
