# **THE STRENGTH AND BUDGET FRIENDLINESS OF MARBLE COMPOSITE**

**unimarble**

**unimarble**

Budget-friendly yet durable marble composite

- ◆ 9 different designs
- ◆ Perfectly suited for window sills
- ◆ Low water absorption
- ◆ Strong and impact-resistant
- ◆ High bending and pressure resistance
- ◆ Easy to polish
- ◆ Budget-friendly
- ◆ Hygienic

#### **BUDGET-FRIENDLY, HIGH-QUALITY COMPOSITE**

**Unimarble marble composite is hard, impact-resistant, and remarkably hygienic. This strong material is ideal for your window sills.**

Brachot Surfaces offers 9 different Unimarble marble composite designs. This strong and budget-friendly material is composed of marble and limestone granulates, colour pigments, and polyester resin. The latter element, in particular, is at the basis of the impact resistance and low water absorption of the Unimarble slabs.

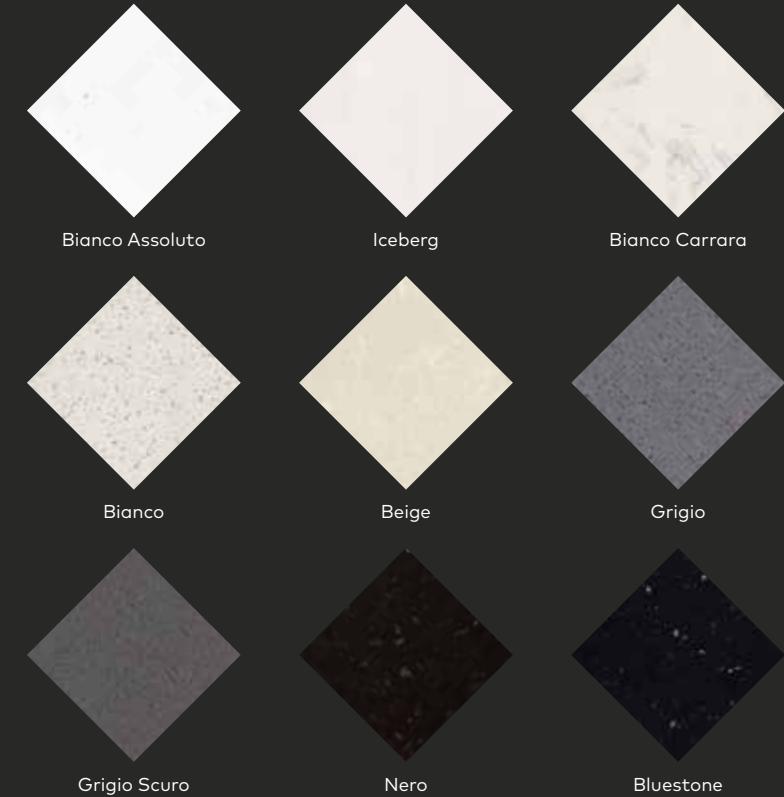

Due to its high hardness and compact composition, Unimarble lends itself for various purposes, particularly decorative uses. This includes window sills, but also of stairs or fireplaces. Marble composite, on the other hand, is not suitable as a kitchen worktop.

# Choose the design that suits you

Unimarble offers 9 different marble composite designs that are easy to combine with any interior style. The colours vary from white to beige, grey, and black. The evenly speckled structure, with sporadic small pigment spots, is unique to composites and give this material character.

The Unimarble slabs are available in a size of 304 x 125 cm and a thickness of 2 and 3 cm. The advantage of the large dimensions is that final products such as window sills, in particular, but also stairs, can be finished without or with just a few seams.

Unimarble Grigio

## Variety of uses

Indoor floors

Window sills

Wall cladding

Decoration

Fireplaces

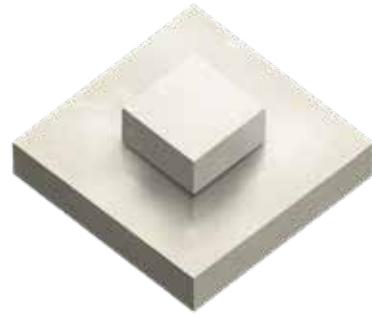

Stairs

Each material has its own specific properties. For more information, please consult the technical data sheet at [www.brachotsurfaces.com](http://www.brachotsurfaces.com).

# Finishes

Technical innovation is in Brachot Surfaces' DNA. We are therefore continuously researching how we can develop new finishes and optimise existing ones.

We offer 2 standard finishes in the Unimarble collection.

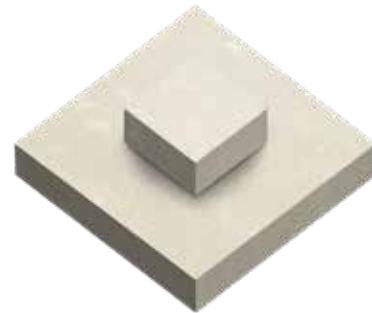

## Polished

The glossiest marble composite finish. Let the colours shine their brightest.

## Honed

The surface is scoured to a matt, even finish.

Unimarble Bianco

# Impact-resistant and particularly durable

Unimarble marble composite has good technical properties. It is initially strong and impact-resistant. This material is therefore resistant to pressure and bending, and has low water absorption. The compact composition ensures that the surface can be highly polished, which makes the colours stand out best.

With the right cleaning products, marble composite can remain intact for generations. We are happy to give you advice and tips for optimal results, from initial cleaning to daily maintenance.

However, marble composite is not resistant to acids, heat, and scratches from metal objects. This material is not suitable for use in the kitchen or for use outdoors.

Brachot Surfaces is a European producer of high-quality natural stone and composite materials with the brands Unistone (quartz composite), Unimarble (marble composite), Uniceramica (ceramics), and Terrazzo (cementitious slab material). Brachot Surfaces is thus a comprehensive supplier of high-quality slab material for interior and exterior finishing. Brachot Surfaces' success lies in the production of slabs in natural stone and composite materials, technical innovation in materials and finishing, as well as years of expertise. Knowledge and experience in the selection of superior blocks are an indispensable asset in the production of natural stone slabs. This makes Brachot Surfaces the ideal partner for the selection and purchase of blocks of natural stone.
